Folding proof — 8-panel Z-fold (accordion) brochure

SHAKOOR Integrated Solutions (Pvt.) Ltd. · one sheet, printed both sides, 4 equal panels per side, 3 folds · **provisional size 420 × 297 mm (105 mm panels) — awaiting printer's K4 specification**

Side A — OUTSIDE (print side 1), as viewed

P1	P2	P3	P4
Back cover Contact & enquiries	**What we do** Services + how we work	**Who we are** Company + industries	**FRONT COVER** Logo, name, tagline

FOLD 1 · MOUNTAIN · FOLD 2 · VALLEY · FOLD 3 · MOUNTAIN

Mountain = fold peak toward you on this side; valley = fold dips away from you on this side.

Side B — INSIDE (print side 2), as viewed after turning the sheet over left-to-right

P5	P6	P7	P8
Security & surveillance behind P4 (front cover)	**Access, attendance & POS** behind P3	**IT, software & web** behind P2	**IoT, marketing & content** behind P1 (back cover)

FOLD 3 · VALLEY · FOLD 2 · MOUNTAIN · FOLD 1 · VALLEY

Each fold is the opposite type on this side. Fully opened, the inside reads left to right: P5 → P6 → P7 → P8.

Duplex (two-sided) printing

- Turn the sheet on its **short edge** (left ↔ right), keeping the top edge at the top.
- Back-to-back pairs: **P4 ↔ P5**, **P3 ↔ P6**, **P2 ↔ P7**, **P1 ↔ P8**.
- Fold lines on both sides must line up exactly; panels are equal width (standard for accordion folds).
- Folding direction: P1|P2 mountain, P2|P3 valley, P3|P4 mountain (seen from the outside).

Folded stack (top to bottom)

1. **P4 — FRONT COVER (face up)**
2. **P5 + P6 — revealed when the cover is opened**
3. **P3 + P2 — next spread (introduction, then overview)**
4. **P7 + P8 — next spread**
5. **P1 — BACK COVER (face down)**

Reading sequence

- **Closed:** front cover P4 on top, back cover P1 underneath.
- **Paging through like a booklet:** P4 → P5|P6 → P3|P2 → P7|P8 → P1.
- **Fully opened, inside up:** all four service panels P5 → P8 in one row.
- **Fully opened, outside up:** P1 back cover · P2 overview · P3 introduction · P4 front cover.

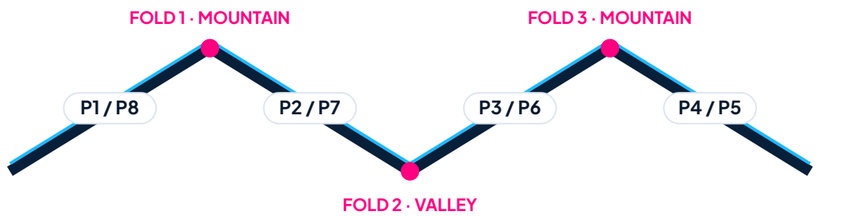

To confirm with the printing agency before the print PDF is made:

1. Exact K4 sheet size (width × height) and whether panels stay equal width.
2. Paper stock and weight (e.g. glossy art paper, gsm) and whether creasing is used.
3. Bleed (3 mm assumed) and whether crop / fold marks are required.
4. Duplex turn: short edge (assumed here) or long edge.
5. Colour: whether they accept RGB PDF and convert to CMYK, or require a CMYK/PDF-X file.

Side view while folding (looking at the top edge)

The sheet zig-zags like an accordion. Each segment is one panel: each label gives the outside-face panel first and the inside-face panel second. Mountain and valley folds alternate, so all four panels stack flat with the front cover P4 on top.

When fully folded the brochure measures one panel: **105 × 297 mm** (provisional).

P1 / P8 = outside face / inside face of the same panel
